Highlights

MyUncleVision: An Interpretable Lattice-Based Framework for Unsupervised Anomaly Discovery in Whole-Slide Histopathology Images

- Lattice smoothing makes any anomaly score spatially coherent
- Settings frozen on a development set, tested once on a held-out cohort
- Frozen score best with DINOv2, poor with handcrafted features; both reported
- MyUncle order and entropy extend to d dimensions; MyUncle simulations as 2nd testbed
- One-command Docker pipeline; real-histology validation planned as future work
